

6516206255.txt

Dear FCC,
I'm writing to give my full support to Satellite Radio. I understand the NAB is attempting to stifle some programming now offered by satellite, namely local traffic and weather. This feature is very important to me. I have a long commute to work and the info provided saves me numerous hours of sitting in traffic. I respectfully urge you to reject the NAB's petition 04-160.

Sincerely,

Lou Meyers
